## Profile

Full Stack Developer with two years of industry experience in website and web application development. Specializing in JavaScript, I possess advanced skills in React.js, Node.js, Express.js, and MongoDB. Additional proficiency in React Native and Next.js further expands my capabilities. My role involves tackling challenges at the intersection of front-end and back-end architecture, contributing to innovative solutions. Working at the cutting edge of technology, I am dedicated to delivering outstanding global user experiences.

## Professional Experience

**MERN Stack developer**, *Bepoj Technology Pvt. Ltd.*

## Skills

HTML/CSS/JS | React.js/Next.js | Node.js/Express.js | MongoDB/My-SQL | React Native  
AWS cloud practitioner | Git/BitBucket

## Languages

English | Hindi | Punjabi

## Projects

**Database emailer** ✉

05/2022 – 09/2022

As a Frontend Developer, I've crafted an engaging website using HTML and CSS, prioritizing a sleek and user-friendly design. Implemented fundamental logic for data show and hide. Ensured code quality and maintained a user-centric approach. Keen on refining and expanding frontend functionalities to enhance the overall user experience.

**Codexview** ✉

10/2022 – 04/2023

I am a Full Stack Developer proficient in crafting dynamic websites from scratch. On the frontend, I've designed a visually appealing user interface using React.js and Next.js, emphasizing responsiveness and a seamless user experience. Additionally, I've implemented essential frontend logic for data transmission to the backend, ensuring efficient communication.

**Leasington** ✉

02/2023 – 05/2023

Responsible for generating a word cloud image and graphs on the backend, optimizing for seamless integration with Azure Storage. Key responsibilities include implementing ng2-charts for server-side rendering, developing logic for word cloud creation, and generating optimized graphs. Ensures error handling, logging, and comprehensive documentation for future reference.

**Admin panel**

07/2023 – 11/2023

Concurrently managing two admin panel projects. Skilled in designing and implementing responsive interfaces, leveraging React's component-based architecture. Committed to delivering optimal user experiences with a track record of successfully handling multiple projects simultaneously.
